PROFESSIONAL SUMMARY

Full Stack Software Engineer and AI Engineer pursuing B.Sc. (Hons.) in Data Science & AI at IIT Guwahati. Built production web apps with React.js, Next.js, Node.js, MongoDB, and PostgreSQL across 2 internships, 3 client projects, and personal full stack projects, including LLM systems (Gemini AI, RAG) and a healthcare platform .

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C
Frontend Development: React.js, Next.js 14, HTML5, CSS3, Tailwind CSS, Context API, Responsive Web Design
Backend Development: Node.js, Express.js, REST API Design & Development, JWT Authentication, Redis, Rate Limiting, Multer, Nodemailer
Databases: MongoDB, Mongoose, MySQL, PostgreSQL, Prisma ORM, Database Design
AI / Machine Learning: LLM Integration, Gemini AI API, RAG, Prompt Engineering, AI Orchestration, Vector Databases, OCR Processing
Tools & Platforms: Git, GitHub, Vercel, Netlify, Render, Docker, Postman, VS Code, Clerk Auth

PROFESSIONAL EXPERIENCE

The Holidays Club | *Full Stack Developer Intern (MERN)* Remote, India | **Jun 2026 to Aug 2026**

- Built the resort discovery module for **114 national and international properties** with a layered Repository, Mapper, Service, and Hooks architecture that cleans scraped data and powers combined filters, search, and sorting.
- Developed an end to end **Careers portal**: a multistep React form with drag and drop resume upload, backed by an Express and Multer API (PDF/DOC validation, 5 MB limit) that stores applications in MongoDB and sends Nodemailer confirmation emails.
- Integrated live maps and weather via Open Meteo APIs, and built a persistent wishlist using React Context and localStorage.
- Shipped the Member Reviews page (27 videos, 43 reviews, gallery of 328 photos), FAQ, Company, and Press pages, plus Open Graph SEO tags.

iAverse | *Full Stack AI Engineer Intern, Healthcare (Full Time)* Remote, India | **Feb 2026 to May 2026**

- Engineered the entire product frontend from the ground up in Next.js, integrating and rigorously testing **38 backend REST APIs** across 4 core modules: Authentication & Admin Control (11), Patient & Appointments (9), Doctor Schedule & Availability (10), and AI powered medical document/OCR processing (8).
- Built backend services using PostgreSQL and Prisma ORM, partnering with the backend team to architect the IVR system, messaging queue, and image storage pipeline supporting the healthcare application.
- Embedded AI tools and LLM workflows into development to ship faster; mapped user flows and caught edge cases and bugs before release.

Axiora Learning | *Freelance Full Stack Developer* Remote | **Feb 2026**

- Built a premium, fully responsive coaching website for IGCSE students in Next.js + TypeScript with a conversion focused UI.
- Cut page load times and shipped SEO friendly pages with a reusable Tailwind CSS component library.
- Gathered client requirements, iterated on feedback, and deployed to production on Vercel, owning the project from kickoff to handoff.

PROJECTS

Live demos: portfolio-krish-lime.vercel.app

TrendPulse | AI Driven Market Insights Engine Mar 2026

GitHub: github.com/Krish9006/TrendPulse

MERN Stack, Gemini AI 2.0, Cron Jobs, REST APIs

- Integrated Google Gemini AI 2.0 (LLM) to convert free form natural language queries into fully structured, categorized market trend
- reports, eliminating the need for predefined query formats.
- Orchestrated a resilient AI fallback layer across multiple models with automatic failover chains, keeping the service running seamlessly
- even when a primary model hit its API quota.
- Automated a Cron scheduled news aggregation pipeline feeding a custom sentiment scoring engine, surfacing actionable trend signals on a
- personalized dashboard.

Krishka Kitchen | Social Commerce Food Platform Nov 2025

GitHub: github.com/Krish9006/krishka_Kitchen

React.js, Node.js, Express.js, MongoDB, Redis, JWT, Context API

- Developed a TikTok style vertical video feed with infinite scroll across 20+ product categories, driving high session engagement through a
- content first, mobile optimized UI.
- Implemented a Redis caching layer for product listings and search results, significantly cutting repeated database reads and improving API
- response time under concurrent load.
- Secured 12+ API endpoints with JWT dual role authentication (User & Partner), rate limiting at 100 requests per 15 minutes, and input
- validation to protect all critical business logic routes.

EDUCATION

Indian Institute of Technology Guwahati **Expected Graduation: May 2027**

B.Sc. (Hons.) in Data Science and Artificial Intelligence

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming (OOP), Algorithms, Python, C

NOTABLE ACHIEVEMENTS

- Solved 800+ LeetCode problems across arrays, graphs, dynamic programming, and trees.
- Independently ran 3 freelance client engagements end to end, from requirements and architecture through deployment and delivery, with no external support.
